## Profile

I'm a two time BAFTA winning developer, dedicated to crafting responsive web experiences. A self-taught programmer, I strive to deliver on time and with strong attention to detail, all whilst being an enthusiastic team player.

## Experience

### Self - May 2017 to Present *Web Developer*

I have taken my passion for code to move towards a career in web development. Over the past several months I have designed, programmed and deployed a responsive CV site. This involved using a desktop first approach in delivering the overall design.

### Ludum Dare 38 - April 2017 *Developer*

Solely designed, developed and scripted a game over three days using a combination of C# and Unity.

### Self - Aug 2016 to April 2017 *Audio Developer*

Recorded, edited and shipped seven commercial sound library products in a variety of styles to online consumers.

### Space Budgie - May 2013 to Aug 2016 *Co-Director*

Co-founded an award winning independent studio. Working as part of a multi-disciplinary team, in this role I multi-tasked in business development, audio programming and audio design. Highlights include two released games on Steam and the development of skills in object-oriented programming.

### B&Q - June 2010 to June 2014 *Customer Advisor*

Working under pressure in a busy retail environment, in this role I used strong customer service skills to respond to all queries.

## Skills

### Technical

- HTML
- CSS
- JavaScript
- jQuery
- GSAP
- C#

### Programs

- After Effects
- Illustrator
- FileZilla
